

# CURRICULUM VITAE

I have experience in a variety of roles, including freelance web and software development. My passion has always been programming and development, and I have a strong attention to detail and an inclination for problem-solving. To build upon this, I recently graduated from a coding traineeship as a full-stack developer, successfully completing two real-world projects to specification using a wide range of programming languages. I have excellent customer service, communication, teamwork, and organizational skills, and a strong work ethic. I am looking forward to establishing a career in the development field where I can prove myself as an asset.

## CODING TRAINEESHIP

**IT Career Switch Ltd**  
Coding Traineeship – Full stack developer  
1-year program

During the traineeship I had to demonstrate a very competent level of the following programming languages and technical skills

- HTML5, CSS3, JavaScript
- PHP, SQL, React, jQuery
- Python, Node.js, Bootstrap
- Command line Git, GitHub
- Remote API access

## ADDITIONAL TECHNOLOGIES:

- cURL, C#, Django, PostgreSQL, AJAX, JSON

## DEVELOPMENT EXPERIENCE:

Below are the two briefs of development projects I completed with IT Career Switch which can be found in my bio: <https://robertpadar.com/>

### **Portfolio Project #1: “Gazetteer”**

The specification was to reply to a website specification for a map-based app to provide information on countries, with a focus on a “mobile-first” development. Preferably using a framework, to then develop HTML, CSS and JavaScript with JQuery modules that use PHP server-based components to source data from third-party APIs (Geonames, OpenWeather). The solution is assessed on its delivery to specification, functionality, and usability.

### **Portfolio Project #2: “Company Directory”**

A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing to develop a “mobile-first” application to

maintain a company personnel database (MySQL). Sign off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system's ability to perform error-free.
